

PointSenz PCM 30-P

PointSenz PCM 30-P is optimised for the electronic measurement of bipolar DC currents, with a galvanic separation between the primary (high power) circuit and the secondary (electronic) circuit.

$$I_{PN} = 30 \text{ A}$$

Electrical data

I_{PNDC}	Primary continuous direct current (nominal)	30	A
I_{PM}	Primary current, measuring range	0 ... ± 60	A
$\hat{I}_P$	Overload capability	30000	At
I_{out}	Analogue output current @ $I = 0$	12	mA
I_{out}	Analogue output current @ $+I_P$	20	mA
I_{out}	Analogue output current @ $-I_P$	4	mA
R_M	Measuring resistance	50 ... 250	Ω
U_C	Supply voltage ¹⁾ ($\pm 15\%$)	+24	V
I_{Cmax}	Maximum current consumption ²⁾	65	mA

Accuracy - Dynamic performance data

X	Accuracy ^{3) 4)} (5 % of $-I_{P...} + I_P$), @ $T_A = +25^\circ\text{C}$, $U_C = +24\text{ V}$	± 1.0	% of I_P
	Position sensitivity relative to center reading (max)	± 1.5	% of I_P
ε_L	Linearity error ³⁾ (0 ... $\pm I_P$)	± 0.2	% of I_P
	External field rejection	200 : 1	
$I_{OE max}$	Maximum electrical offset current @ $I_P = 0$, $T_A = 25^\circ\text{C}$	$\pm 12 \pm 0.3$	mA
$I_{OE typ}$	Typical electrical offset current @ $I_P = 0$, $T_A = 25^\circ\text{C}$	$\pm 12 \pm 0.1$	mA
I_{OM}	Magnetic offset current @ $I_P = 0$ and specified R_M , after an overload of $3 \times I_{PN}$	± 0.02	mA
I_{OT}	Temperature variation of I_O , $T_A = -25^\circ\text{C} \dots +70^\circ\text{C}$	± 0.03	mA/ $^\circ\text{K}$
TCG	Temperature coefficient of G , $T_A = -25^\circ\text{C} \dots +70^\circ\text{C}$	± 0.05	%/ $^\circ\text{K}$
t_r	Step response time to 90 % of I_{PN} ⁵⁾	< 5	μs
BW	Frequency bandwidth (-3 dB)	DC ... 1	kHz

General data

T_A	Ambient operating temperature (continuous)	-25 ... +55	$^\circ\text{C}$
	(intermittent)	-25 ... +70	$^\circ\text{C}$
T_S	Ambient storage temperature	-25 ... +85	$^\circ\text{C}$
	Relative humidity $T_A = 40^\circ\text{C}$	95	%
m	Mass	130	g
Standards: Electrically driven points machine		BS 581	
Vibration		BR 967: 1973 cat. D	
EMC		EN 50121-5: 2001	
EMC		EN 50121-3-2: 2015 ⁶⁾	
Railway applications (power supply, temperature & humidity)		EN 50155: 1995	

This product is designed to conform with the relevant sections of GM/RC 1500, and is intended for use in applications and environments which comply with GS/ES 1914 and GM/R7 1031.

Features

- Closed loop (compensated) current transducer using the Hall effect
- Panel mounting
- Split core design for easy installation
- Insulating plastic case recognized according to UL 94-V0
- Water resistant design rated to IP 67
- Reverse polarity protected.

Advantages

- Excellent accuracy
- Very good linearity
- No insertion losses
- Current overload capability
- Non-contact measurement (does not need a safety case).

Applications

- Points condition monitoring
- Signal light indication
- Battery supplied applications
- Uninterruptable Power Supplies (UPS).

Application Domain(s)

- Track side.

Notes:

¹⁾ Reverse polarity protection

²⁾ Including I_{out}

³⁾ Excludes electrical offset

⁴⁾ Includes linearity with the conductor in the center of the aperture

⁵⁾ For a $di/dt > 50 \text{ A}/\mu\text{s}$

⁶⁾ Deviation of the offset during the test IEC 61000-4-3 @ 20V/m between 500 MHz and 1 GHz

Current Transducer PCM 30-P

Insulation coordination

U_b	Rated insulation RMS voltage	50 Min	V
d_{cp}	Creepage distance	12	mm
d_{cl}	Clearance	10	mm
CTI	Comparative tracking index (group IIIa)	175	

Safety

This transducer must be used in electric/electronic equipment with respect to applicable standards and safety requirements in accordance with the manufacturer's operating instructions.

Caution, risk of electrical shock

When operating the transducer, certain parts of the module can carry hazardous voltage (e.g. primary busbar, power supply).

Ignoring this warning can lead to injury and/or cause serious damage.

This transducer is a build-in device, whose conducting parts must be inaccessible after installation.

A protective housing or additional shield could be used.

Main supply must be able to be disconnected.

Dimensions PCM 30-P (in mm)

Mechanical characteristics

- General tolerance ± 0.5 mm
- Primary through-hole $\phi 15$ mm
- Connection of secondary Via 4 core screened polyurethane cable 0.25 m in length, Halogen free, terminated with Switchcraft EN3L4M connector
- Enclosure UL 94-V0 rated plastic

Remarks

- I_{out} is positive when I_p flows in the direction of the arrow.
- Temperature of the primary conductor should not exceed 90°C .
- This unit is intended for direct mounting in track side applications. It should only be installed or removed from isolated hazardous live conductors or uninsulated hazardous live conductors which are switched off.
- As it is a sealed unit no moisture should be allowed to ingress into the unit during installation.
- Connections between the transducer and the customers power supply and output monitoring equipment should be made with screened cable.
- Installation of the transducer must be done unless otherwise specified on the datasheet, according to LEM Transducer Generic Mounting Rules. Please refer to LEM document N°ANE120504 available on our Web site: [Products/Product Documentation](#).
- This is a standard model. For different versions (supply voltages, turns ratios, unidirectional measurements...), please contact us.

IMPORTANT NOTICE

The information in this document is considered accurate and reliable. However, LEM International SA and any company directly or indirectly controlled by LEM Holding SA ("LEM") do not provide any guarantee or warranty, expressed or implied, regarding the accuracy or completeness of this information and are not liable for any consequences resulting from its use. LEM shall not be responsible for any indirect, incidental, punitive, special, or consequential damages (including, but not limited to, lost profits, lost savings, business interruption, costs related to the removal or replacement of products, or rework charges) regardless of whether such damages arise from tort (including negligence), warranty, breach of contract, or any other legal theory.

LEM reserves the right to update the information in this document, including specifications and product descriptions, at any time without prior notice. Information in this document replaces any previous versions of this document. No license to any intellectual property is granted by LEM through this document, either explicitly or implicitly. Any Information and product described herein is subject to export control regulations.

LEM products may possess either unidentified or documented vulnerabilities. It is the sole responsibility of the purchaser to design and operate their applications and products in a manner that mitigates the impact of these vulnerabilities. LEM disclaims any liability for such vulnerabilities. Customers must select products with security features that best comply with applicable rules, regulations, and standards for their intended use. The purchaser is responsible for making final design decisions regarding its products and for ensuring compliance with all legal, regulatory, and security-related requirements, irrespective of any information or support provided by LEM.

LEM products are not intended, authorized, or warranted for use in life support, life-critical, or safety-critical systems or equipment, nor in applications where failure or malfunction of an LEM product could result in personal injury, death, or significant property or environmental damage. LEM and its suppliers do not assume liability for the inclusion and/or use of LEM products in such equipment or applications; thus, this inclusion and/or use is at the purchaser's own and sole risk. Unless explicitly stated that a specific LEM product is automotive qualified, it should not be used in automotive applications. LEM does not accept liability for the inclusion and/or use of non-automotive qualified products in automotive equipment or applications.

Applications that are described herein are for illustrative purposes only. LEM makes no representation or warranty that LEM products will be suitable for a particular purpose, a specified use or application. The purchaser is solely responsible for the design and operation of its applications and devices using LEM products, and LEM accepts no liability for any assistance with any application or purchaser product design. It is purchaser's sole responsibility to determine whether the LEM product is suitable and fit for the purchaser's applications and products planned, as well as for the planned application and use of purchaser's third-party customer(s).

Stressing and using LEM products at or above limiting values will cause permanent damage to the LEM product and potentially to any device embedding or operating with LEM product. Limiting values are stress ratings only and operation of the LEM product at or above conditions and limits given in this document is not warranted. Continuous or repeated exposure to limiting values will permanently and irreversibly affect the quality and reliability of the LEM product.

LEM products are sold subject to the general terms and conditions of commercial sale, as published at www.lem.com unless otherwise agreed in a specific written agreement. LEM hereby expressly rejects the purchaser's general terms and conditions for purchasing LEM products by purchaser. Any terms and conditions contained in any document issued by the purchaser either before or after issuance of any document by LEM containing or referring to the general terms and conditions of sale are explicitly rejected and disregarded by LEM, and the document issued by the purchaser is wholly inapplicable to any sale or licensing made by LEM and is not binding in any way on LEM.
